SUMMARY

Software Engineer focusing on Full-Stack development, database creation, and code debugging, eager to apply problem-solving skills in building reliable and secure software solutions.

SKILLS & CERTIFICATIONS

Languages: Python, JavaScript, SQL, HTML/CSS
Databases: SQL, PostgreSQL
Technologies: ReactJS, Flask, Jinja2, Flask-SQlAlchemy, Bootstrap, Microsoft Power Platform

Certifications:

- Microsoft Power Platform Fundamentals (PL900) - 2024
- Microsoft Power Platform Functional Consultant (PL200) - 2024
- Microsoft Power Platform Developer (PL400) - 2024

Microsoft Skills:
- Developing solutions using Power Apps, Power Automate, and Power Pages
- Analyzing data with Power BI

EDUCATION

Software Engineering Program
Hackbright Academy • Live-Online • 2023
Front-End Web Development Fundamentals
Udacity • Remote • 2023
West African Examinations Council (High School Diploma)

West African Senior School Certificate • 2008

PROJECTS

Pharaohz Cart
Hackbright Academy   http://pharaohz.net
- Led the development of an e-commerce cart system as a capstone project during my time at Hackbright Academy.
- Utilized Python, Flask, JavaScript, Jinja2, Bootstrap, and PostgreSQL in creating dynamic pages.
- Utilized Bootstrap and CSS3 to improve the User Interface.
- Introduced 'Bulk Delete' and 'Bulk Checkout', enabling flexibility in cart management.
- Integrated PostgreSQL for stable cart storage, reducing abandonment rates.

TandemTech Networks

https://github.com/edomanuli/FRONTEND-TandemTech

- Contributed to a React-based frontend for a system that enables users to manage their phone plans effectively, including adding and removing devices, swapping numbers, and managing plans.

Organic Diabetic (Landing Page)
CodSoft   https://organic-diabetic.onrender.com
- This simple landing page was built using HTML5, CSS3, and Bootstrap.
- It is a simple webpage that emphasizes responsive web development to include all screen sizes.

Calculator
CodSoft   https://calculator-e05n.onrender.com
- This basic calculator was built using HTML5, CSS3, JavaScript, and Bootstrap.
- This basic calculator helps to compute simple math problems.

INTERNSHIP

Web Developer Intern   **January 2024**
CodSoft   **Remote**
- Utilized web development tools and languages to build a portfolio site, a basic math calculator, and a landing page for "Organic Diabetic".
- Met project deadlines and maintained high coding standards in a fast-paced, independent work environment.
- Reviewed and tested web pages to ensure they met quality assurance standards and provided a user-friendly experience.

EXPERIENCE

Data Annotator and Social Media Evaluator   **October 2021 - September 2023**
Appen (Independent Contractor)   **Remote**
- Utilized annotation tools/software to tag and categorize data accurately.
- Met quality assurance standards and deadlines in a fast-paced, independent work environment.
- Analyzed social media posts and classified them correctly according to pre-defined criteria.
- Reviewed social media ads and posts to ensure they meet predefined guidelines (not offensive).
- Assessed AI responses to user queries for completeness in response, natural language, and usefulness of response to the query.

Technical Support Representative   **April 2021 - July 2021**
- **Empereon Constar**   **Texas**
  Effectively identified customer needs, communicated solutions, and provided customers with relevant and accurate product information.
- Utilized customer service principles and communication techniques to ensure customer satisfaction.
- Documented all support interactions, which improved the knowledge base and enhanced future troubleshooting efficiency.
- Logged equipment replacement or maintenance requests from customers.
- Resolved the majority of customers' network-related issues with a first-call resolution.
